

## **The 17th China International Copper Forum (2019)**

### **Background**

In 2019, the macroeconomic situation at home and abroad is complex and volatile, and the downward pressure on the global economy will increase. The trade frictions between China and the United States will have an obvious impact on the industries. In order to discuss the development trend of the global copper industry and promote the high-quality and coordinated development, China Nonferrous Metals Industry Association, together with Aluminum Corporation of China, Qiqihar Municipal Government and Shanghai Futures Exchange, jointly held the 17th China International Copper Forum.

The Forum is organized by Beijing Antaiko Information Co., Ltd. and Fulaerji District Government, and is scheduled to be held in Qiqihar City, China's Heilongjiang Province from September 4 to 6, 2019. The theme is "new era, new drivers and new opportunities".

The Forum offers a mixture of keynote speeches, expert discussions, and site visits. It is a perfect opportunity to meet and learn from key industry professionals. Every year, the Forum attracts about 500 delegates, including refineries, smelters, traders, fabricators, metal consumers and traders, covering the full chain.
